

DATA MASONS | EDI MADE SIMPLE[®]

software

BENEFITS FOR VANTAGE POINT EDI USERS

- Managed compliance, with Data Masons managing both labeling and ASN maps
- Accelerated implementation delivers business benefits from day one
- Efficient, single-click packing options allow users to quickly complete tasks
- Extends the value of current technology investments for organizations utilizing WMS solutions with built-in ASN capabilities

Advance Ship Notice (ASN) Subsystem for Vantage Point EDI

Streamlined ASN Processing Improves Accuracy and Lowers Costs

Vantage Point EDI's user-friendly ASN software provides a "drag-and-drop" style of packing and shipping orders that allows warehouse workers to quickly master the solution without extensive training. The software's graphics-based workflow interface is not only easy to use, it enables users to easily view all ASN processing steps in the appropriate sequence.

For organizations that have an existing Warehouse Management Solution (WMS) or ASN solution, Vantage Point's ASN solution is designed to extract data from other ASN shipping solutions and generate partner-compliant ASNs.

Vantage Point's ASN solution features Include:

- Multi-user packing and ASN creation
- Native UCC-128 labeling according to partner specifications
- Intuitive, graphics-based user interface
- Numerous time-saving auto-pack options for standard pack and "pick and pack" operations
- Manifest and shipping system integration options
- Interface to FedEx consignee shipments
- VIC's bill of lading printing
- Supports all ASN standards, including SOPI, SOIP, SOTPI, SOTIP and SOI
- Can easily re-open shipments, edit and re-send ASNs to partners
- Designed for integration to WMS solutions with ASN data capture and labeling capabilities
