software

EDI MADE SIMPLE.

BENEFITS FOR VANTAGE POINT EDI USERS

- Provides the means for efficient and error-free communication with Remote (3PL) Warehouses
- Saves time by transmitting outbound shipment and billing orders automatically
- A key ingredient for efficient and accurate supply chain distribution activities
- Automatically generates the 940 Warehouse Shipping Order directly from pick tickets
- Selects orders for billing from the 945 Warehouse Shipping Advice

940/945 Remote (3PL) Warehouse EDI

Integrated 940/945 Remote Warehouse EDI Documents Save Time and Eliminate Common Errors

Does your company use or plan to use Remote (Third Party Logistics, or “3PL”) Warehouses for the distribution of goods? If so, many warehouses utilize electronic business document exchange to increase efficiency and eliminate errors. If you are using Vantage Point EDI, these documents can be transmitted directly from Microsoft Dynamics® sales order pick tickets.

Remote (3PL) Warehouse EDI documents are separated into two transactions: the 940 Warehouse Shipping Order and 945 Warehouse Shipping Advice. The 940 is a request to ship document that directs the Remote (3PL) Warehouse to ship an order with all of the associated shipment detail including items and customer ship-to information. The 945 Shipment Advice is returned from the Remote (3PL) Warehouse which provides the information necessary to invoice the customer or even send the Advanced Ship Notice (ASN) from Vantage Point EDI.

Vantage Point Warehouse EDI is also the perfect solution for companies shipping to large retailers such as Target and Wal-Mart that require detailed EDI information on the ASN from the warehouse.

Both documents are integrated with the Microsoft Dynamics sales order entry system. The 940 Warehouse Shipping Order is generated and transmitted from sales order information. The 945 Shipment Advice can optionally select the order for billing using the information transmitted by the Remote (3PL) Warehouse.
